Java Backend Developer with 4 years of experience building scalable microservices and RESTful APIs using Java and Spring Boot. Skilled in deploying applications on AWS and Kubernetes and implementing CI/CD pipelines to deliver reliable software solutions.

EXPERIENCE

ADP (Info Services Digitech Pvt Ltd. Consultant)

Feb 2025 - Present

Java Developer

Hyderabad, India

- Delivered Manage Users and SSO sign-in features for the Smart Compliance Canada project.
- Enhanced UI/backend modules, integrated REST APIs, resolved production issues, and developed advanced search, error handling, and user management workflows.
- Contributed to the eNets to Affinity migration, ensuring seamless data transfer and system integration.
- Implemented TTS download functionality and supported multiple encryption/decryption options.

Infosys

Sep 2021 - Jan 2025

Senior Systems Engineer

Hyderabad, India

- Contributed to the development of a credit card closure model for **Westpac**, automating customer verification, balance validation, and document generation via external APIs, reducing processing time by 40%.
- Collaborated with cross-functional teams to automate processes, improving operational efficiency by 30%.
- Deployed and managed scalable backend services on Kubernetes, ensuring compliance with banking security standards.
- Conducted code reviews and wrote comprehensive documentation, improving development efficiency and facilitating faster bug resolution.

Systems Engineer

- Designed and implemented RESTful APIs for **Inmarsat**'s telecom services, leveraging **Java 8**, **Spring Boot**, and AWS for seamless, scalable deployments.
- Increased application performance by 20% and reduced downtime through proactive issue resolution and performance monitoring.
- Collaborated with stakeholders to ensure deliverables aligned with client requirements and deadlines, improving stakeholder satisfaction.
- Maintained **CI/CD pipelines** using **Git**, **Jenkins**, and Dynatrace, enhancing deployment efficiency and ensuring system stability.

TV2Z, Inc.

June 2021 - Sep 2021

Software Engineer Intern

Hyderabad, India

- Developed and maintained the Spring Automation framework for an OTT (Over-The-Top) web application, utilizing Java, Selenium WebDriver, JUnit, and TestNG.
- My responsibilities included continuous development and optimization of the automation framework to ensure its reliability and efficiency in testing the OTT web application.
- Collaborated with development and QA teams to adapt to changing requirements and boost overall testing quality.

EDUCATION

Rajiv Gandhi University Of Knowledge Technologies - IIIT

June 2017 - Aug 2021

Bachelor of Technology in Computer Science Engineering **CGPA: 8.2 / 10**

Nuzvid, India

SKILLS

Languages/Frameworks: Java, Spring Boot, REST APIs, Hibernate, Microservices, Spring Cloud, Kafka, SQL, MongoDB

Tools: GitHub, Jenkins, Kubernetes, AWS/Lambda/S3/API Gateway/CloudWatch, CI/CD, NewRelic/Dynatrace, Postman, Jira, Confluence, Splunk

Courses: Data Structures and Algorithms, Computer Networks, Operating Systems, Web Design-HTML,CSS,JavaScript

PROJECTS

Superkart eCommerce Application

- Developed a scalable eCommerce platform using Java, Spring Boot, and Microservices, with JWT authentication and role-based access control.
- Integrated PayPal payment gateway, MySQL with Hibernate for data management, and used Spring API Gateway for efficient request routing. Streamlined build and deployment processes with CI/CD pipelines using Jenkins and Docker.
- Deployed microservices on AWS with Spring Cloud and managed service communication via Spring Cloud Gateway for optimized scalability and reliability.

GENAI Webex Chatbot Integration

- Designed and implemented a Generative AI-powered chatbot integrated with Webex, utilizing Java, Spring Boot, Python, and JavaScript for cross-platform functionality.
- Automated tracking and management of JSD and Jira tickets, provided real-time updates on eNets file transfers, fetched holiday information, monitored Splunk alerts, and sent notifications via email.
- Leveraged advanced natural language processing for intuitive user interactions, enabling users to query ticket status, assign tasks, and receive operational alerts directly within Webex.
- Integrated REST APIs, robust error handling, and workflow automation, supporting both backend and frontend modules for a comprehensive user experience.
